Types of Statistics:

- Descriptive Statistics
- Inferential Statistics

Math for Machine Learning

Types of Statistics

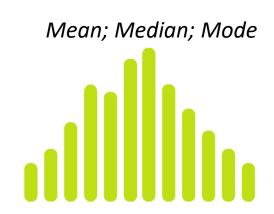

- > Describe the data
- Data Analysis

- Get inferences about the data
- Data Science

Types of Statistics

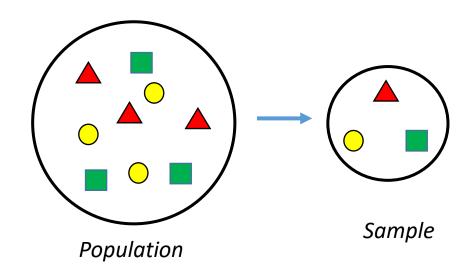

1. Descriptive Statistics:

Descriptive statistics are used to describe the basic features of the data in a study. They provide simple summaries about the sample and the measures.

2. Inferential Statistics:

Inferential statistics takes data from a sample and makes inferences and predictions about the larger population from which the sample was drawn.

Descriptive Statistics

2 important measures of Descriptive Statistics:

- 1. Measure of Central Tendencies (Mean, Median, Mode)
- 2. Measure of Variability (Range, Standard Deviation, Variance)

Boston House Price Dataset

The dataset used in this project comes from the UCI Machine Learning Repository. This data was collected in 1978 and each of the 506 entries represents aggregate information about 14 features of homes from various suburbs located in Boston.
